I have worked in various fields of software development; starting as Java applications **support analyst**, and going through positions as a **java backend developer** for three years, using Spring boot, I have experience developing microservices, relational and non-relational databases like SQL server, MongoDB, Oracle SQL, GIT versioning tool, IDEs like Eclipse, IntelliJ IDEA, Unit test with Junit and Mockito. I have worked with clouds like Azure and AWS. I have experience working with agile development as a **scrum master**, and as a **project leader**. Currently, I am specializing in the development of applications with spring-boot, functional and reactive programming and using hexagonal architecture.

## WORK EXPERIENCE

### Analyst 2

#### Grupo Exito

04/2018 - 31/07/2023

Achievements/Tasks

Vtex support – java support – java analyst - project leader - Scrum master.
